

Excavator Track Adjuster Assemblies

ITR offers a wide range of complete Track Adjuster Assemblies, Recoil Springs, for use on a wide range of popular excavator applications.

Maintaining proper track tension is critical to receiving satisfactory track life. Adjusters are designed to absorb shock, provide proper track tension and protect idlers and track systems. Weak or broken recoil springs, poorly functioning adjusters may shorten track and idler life.

ITR adjusters and recoil assemblies are engineered to provide proper tension, excellent service in demanding applications and extreme operating conditions.

Manufactured to rigid quality standards and inspected to insure a proper fit & function in the field.
